

Name

Relational Databases

Description

Rubric Detail

Criteria	Levels of Achievement		
	Novice	Competent	Proficient
Conceptual model	0 to 4 points Conceptual model contains lots of errors, contains database specific details, or does not demonstrate advanced features.	5 to 7 points Conceptual model contains some errors or database specific details.	8 to 10 points Conceptual model demonstrates advanced ER features, contains no errors or database features.
Translation into Relation Schema	0 to 4 points Some effort has been made to translate the conceptual model but the relational schema contains major errors.	5 to 7 points Conceptual model has mostly been translated into a relational schema. Schema may contain some errors.	8 to 10 points Conceptual model successfully translated into relational schema including all constraints and key references.
Implementation of the Schema	0 to 4 points The database creation statement contain several errors or omit large parts of the logical schema and/or there are errors loading the data.	5 to 7 points The database creation statements contains some errors and/or there are issues with the data loading or insufficient data loaded.	8 to 10 points The database creation statements completely capture the database model and data has been loaded without any problems.
Query 4a	0 to 1 points Query does not run and/or does not answer the question	2 to 3 points Good attempt at answering the question, but either does not answer the question properly or output is missing.	4 to 4 points Query generates the correct answer and the output has been provided.

Criteria	Levels of Achievement		
	Novice	Competent	Proficient
Query 4b	0 to 1 points Query does not run and/or does not answer the question	2 to 3 points Good attempt at answering the question, but either does not answer the question properly or output is missing.	4 to 4 points Query generates the correct answer and the output has been provided.
Query 4c	0 to 1 points Query does not run and/or does not answer the question	2 to 3 points Good attempt at answering the question, but either does not answer the question properly or output is missing.	4 to 4 points Query generates the correct answer and the output has been provided.
Query 4d	0 to 1 points Query does not run and/or does not answer the question	2 to 3 points Good attempt at answering the question, but either does not answer the question properly or output is missing.	4 to 4 points Query generates the correct answer and the output has been provided.
Query 4e	0 to 1 points Query does not run and/or does not answer the question	2 to 3 points Good attempt at answering the question, but either does not answer the question properly or output is missing.	4 to 4 points Query generates the correct answer and the output has been provided.
